Ketan Badhe

Stamp 4 | Dublin, Ireland

+353 (0) 894835592 | : badhe.ketan@gmail.com | : LinkedIn | : Portfolio website

Profile:

- 6+ years in **DevOps/SRE** specializing in **CI/CD, automation, configuration management,** and **release orchestration.**
- Led automation and cost-optimization programs that achieved significant savings (**"saving ~$265,000/year"**) and reduced manual work by **~20 hours/week** overall.
- Deep expertise in **AWS cloud, Infrastructure as Code(CloudFormation, Terraform), scripting, and orchestration tools** to drive innovation and standardization.
- Strong **problem-solver** skilled in **root cause analysis**, **incident reduction**, and continuous **process improvement**.
- Recognized for **mentoring** and **leading teams** to deliver impactful automation solutions that significantly **reduce manual effort** and enhance **reliability**.

Languages: English (Fluent – Verbal & Written)

Training & Certifications:

AWS **Certified Developer -** Associate
Developing **Generative AI** Applications on AWS
DevOps Engineering on AWS
Cloud **Financial Management** Digital Training(**FinOps**)

Technology Skills:

- **Programming and Scripting Languages:** Python, Bash/Shell Scripting, Groovy, YAML
- **Cloud IaaS & SaaS Platforms:** Amazon Web Services(AWS), Salesforce, Atlassian, Slack, Glean
- **IaC, Orchaestration & CI/CD Tools:** Jenkins, TeamCity, Chef, Terraform, Docker, Kubernetes, GitHub, BitBucket
- **Networking:** VPC, DNS, WAF, TCP/IP, UDP, Routing Protocols, layers, Load balancers, Firewalls, ACLs
- **Observability Tools:** Datadog, Kibana

Key Achievements:

- **"Champion of the Quarter** (QF3 & QF4 - 2025)" – EMEA Region for exceptional contributions in automation and process improvement.
- **Received 25+ positive feedbacks** from peers and managers for innovation, ownership, and consistent delivery.
- **Independently resolved high-impact incidents**, including the CrowdStrike issue and a complete database drop, preventing customer downtime.
- **Presented automation solutions** to upper management and during internal tech webinars, promoting best practices and knowledge sharing.

Work Experience:

Guidewire Software, Ireland | Site Reliability Engineer III
December 2022 - Current
(Previously: Cloud Network Operations Engineer)

- **Led automation and cost optimization projects** using AWS, scripting, and orchestration tools, achieving a **41.6% reduction in RDS costs**, **23.0% reduction in EC2 costs**, and **20.9% reduction in other EC2-related costs**, saving over **$265,676** annually.
- **Built Python-based automation solutions** for deployment, configuration, and patching, reducing manual efforts and enhancing system reliability.
- Developed CI/CD pipelines in **Jenkins** and **TeamCity**, improving deployment speed and process efficiency.

- **Implemented infrastructure-as-code (Terraform/Helm)** to standardize multi-tenant provisioning and prevent configuration drift.
- Defined SLIs/SLOs and error budgets; instrumented dashboards and alerts with **Datadog** to monitor adherence and prioritize customer-impactful work.
- Created key automation tools, including:
  - Jira-to-Salesforce integration: saving **~15–20 minutes per case**.
  - Google Sheets-to-Runbook-to-Jira workflow: saving **~10 hours weekly**.
  - Automated pre-deployment workflow: saving **450 minutes every two weeks**, equating to **~195 hours/year**.
  - PR creation and update automation: saving **270 minutes every two weeks**, equating to **~117 hours/year**.
  - Bulk Jira ticket automation: saving **4 hours weekly**, equating to **~208 hours/year**.
  - Salesforce case creation from Jira: saving **3 hours weekly**, equating to **~156 hours/year**.
  - Automated cost reporting using Jenkins, providing leadership with real-time spend insights, enhancing decision-making.
- **Led incident response and postmortems**, driving corrective actions and systemic reliability improvements, while maintaining comprehensive runbooks.
- **Mentored 11 team members** in process automation and deployment best practices, and delivered automation projects for **4 distinct teams within the organisation**, enhancing team efficiency and capability.

Amdocs, India | Technology Engineer
September 2018 – August 2021
(Previously: Technology Integration Engineer)

- Resolved **billing application issues** for clients and ensured seamless operation.
- Focused on **automation**, **containerization**, **integration monitoring**, and **configuration management**.
- Developed software release management strategies in line with Agile processes.
- Operated **Kubernetes** for orchestrating Docker container **deployment** and **scaling**.
- Utilized **scripting** to automate deployments and detect configuration errors, enhancing efficiency.
- Supported multiple applications to maintain operational health and performance.
- Set up e**lastic load balancers** and coordinated emergency fixes across **WebLogic** servers.
- Managed release communication and coordination during project roll-outs.

Education:

Masters in Cloud Computing | National College of Ireland, Dublin
September 2021 - August 2022

- **Modules:** Cloud Architecture, Cloud DevOpsSec, Cloud Platform Programming, Blockchain Concepts, Fog and Edge Computing, Cloud Machine Learning, and Scalable Cloud Programming.

Bachelor of Engineering in Computer Science | University of Mumbai
June 2014 – June 2018

- **Modules:** Cloud Computing, Parallel and Distributed Systems, Digital Forensics, Microprocessors, Operating Systems, Computer Networks, Mobile Computing, Distributed Databases, Data Structures, Object Oriented Programming.
